

Assessment of size and quantity of gold deposits and reserves in Ghana and engineering sampling consulting Ashanti Region, Ghana

Personal Reference Dr R. Schwarz¹, Dipl.-Berging. Karl-Dieter Markus²

Background

A private client and holder of mining licences for relevant areas awarded a contract to geotec Rohstoffe GmbH to provide engineering consulting services for field work in Ghana, to analyse and interpret samples, and to develop a "competent person" report including assessment of size and quantity of deposits and reserves in accordance with JORC Code 2004
